

The logo for ReliaCloud features the word "Relia" in orange and "Cloud" in grey, with a trademark symbol. A stylized grey cloud graphic is positioned behind the text.

ReliaCloud™

Cloud Done Right

Security and Reliability in the Cloud

Jason Baker, CTO

January 28, 2010

About ReliaCloud

ReliaCloud is an IaaS cloud designed to provide reliable, elastic, low-cost infrastructure.

Datacenter 1: St. Paul, Minnesota

Benefits

- » **Reliable, elastic, and inexpensive**
- » **Scale from 1 to 100s of windows and linux/bsd servers**
- » **HA and Load balancing included**
- » **Pay by the hour - starting at 5c/hour**
- » **No setup fees**
- » **No long-term contracts**
- » **24x7x365 customer support**

Cloud security challenges

- » Put Applications in = Get Applications out?
- » Physical and logical security protection
- » Extending the enterprise security domain
- » Accountability and supervision
- » Encryption - who holds the keys

How we address security concerns

- » One of the first Regional Clouds
- » Datacenter security policies (SAS70 II)
- » True Cisco firewall security perimeter
- » Virtual private cloud network
- » Customer controls firewall access lists
- » Customer fully controls server
- » 3rd party cloud mgmt -- Enstratus
- » Future: VPN gateway access
- » Future: Private cloud infrastructure

Partner Channel

- » **Affiliate Partners**
- » **Value Added Resellers**
- » **Private Label Program**
- » **Strategic Alliance**
